## DETAILED ACTION

### *Claim Objections*

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-20 been renumbered 17-36. Applicant canceled claims 1-16 which were originally presented in the application papers. Applicant then added new claims. The new claims must be numbered beginning with the number next following the highest numbered claims previously presented.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 25-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 25 is rejected based on lack of positive antecedent basis of "the backplane operational configuration" on line 10.

5. Claims 26-34 are rejected because they depend on claim 25.

6. Claim 35 is also rejected based on lack of positive antecedent basis of "the backplane operational configuration" on lines 14-15.

***Allowable Subject Matter***

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not appear to show the claimed limitations of verifying that all of the bus controller cards at the same model, mutually comparing the configuration control switches of the bus controller cards, and preventing bus connection of bus controller cards with mutually different configuration control switches.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references are mainly patents issued to the applicant that are directed to similar aspects of the invention, however, there does not appear to be any double patenting issue in this case. Other references were also cited in the parent application.
